EDUCATION

PXL UNIVERSITY OF APPLIED SCIENCES

BSC IN COMPUTER SCIENCE
Jun 2020

SKILLS

PROGRAMMING

- C#/.NET
 - Entity framework
 - ASP.NET Core
 - MVC
 - LINQ
- TypeScript/JavaScript
 - React
 - Redux Toolkit
 - Node
 - WebSockets
- HTML & CSS
- Python
 - Flask
- Java
 - SPRING
 - Hibernate
 - Maven
 - JUnit
- Rust
 - Tokio
 - Tauri
 - Axum

TECHNOLOGIES

DevOps: Git/GitHub, Docker

OS: Linux, Unix, Windows

Data: PostgreSQL, MySQL, SQL
Server, Elasticsearch, Logstash, Kibana

LANGUAGES

Fluent:

- English
- Dutch

Beginner:

- French

EXPERIENCE

FRONT-END SOFTWARE ENGINEER

TenForce | Jan 2024 - Dec 2024 | Leuven - Belgium

- Updated the company's web application using React, TypeScript and Redux.
- Enhanced UI/UX components to improve performance, accessibility, and maintainability.
- Worked closely with back-end teams in an agile environment to integrate APIs and optimize front-end responsiveness.
- Developed and tested backend endpoints using .NET Core and ASP.NET. Unit tests written in xUnit and NUnit.
- Created integration tests with Selenium to ensure UI functionality and reliability.

FULL-STACK SOFTWARE ENGINEER

TenForce | Dec 2021 - Dec 2023 | Leuven - Belgium

- Coordinated with multiple international clients and companies to develop fit-for-purpose software products.
- Developed an image recognition application as part of a European research initiative.
- Designed and deployed an Elasticsearch, Logstash, Kibana stack (ELK) for real-time monitoring and analytics.
- Used WebSockets for real-time displays of custom UI elements.
- Developed a back-end in Python and Node.js that preprocesses data from MySQL databases.
- Led technology selection for software development, ensuring optimal performance and scalability.
- Organized meetings with the vendor to receive in-depth product information and answers to cross-departmental questions.
- Implemented Docker-based deployment for seamless containerized application scaling.
- Used the Open Data Protocol (OData) to write REST endpoints.

SOFTWARE ENGINEERING INTERN

Tobania | Jan 2020 - May 2020 | Hasselt - Belgium

- Developed a machine learning prediction model to forecast electricity consumption using historical data and seasonal trends.
- Implemented the predictive application using C# and ML.NET, optimizing accuracy and adaptability to demand fluctuations.
- Collaborated with stakeholders to gather requirements and refine model performance, ensuring business alignment.
- Integrated AI-based solutions into real-world applications, enhancing predictive capabilities for energy planning.
- Gained hands-on experience in machine learning workflows, data preprocessing, and algorithm optimization.

PROJECTS

SKYRIM MODIFICATION | PERSONAL PROJECT

Dec 2024 - ongoing

- Developed a dynamic-link library (DLL) in C++ using the Skyrim Script Extender (SKSE) to enhance gameplay features.
- Used memory reading and in-process manipulation techniques to alter runtime behavior.
